

KEYSTONE COMPAC HEWNSTONE UNIT

Featuring an open core design and a pin connection system that is trusted by engineers and contractors around the world, the Keystone Compac Hewnstone Unit is lighter weight than other structural blocks and has a shortened tail design that makes it easier to handle and perfect for any commercial projects.

The improved geometry of the Keystone Compac Hewnstone Unit allows for easier installation and increased connection strength with geogrid reinforcement. This unit allows for various positive connections with reinforcement to build walls in excess of 60 feet tall.* Units are interlocked with high-strength fiberglass units.

The Keystone Compac Hewnstone is a perfect example of Sculpterra™ Technology in action, combining the strength and solid reputation of the Keystone Compac with the aesthetic beauty of a natural textured face. With unduplicated stone appeal, Keystone Compac Hewnstone provides a proven history of successful wall projects. It continues to lead the market in visual appeal, structural stability, and engineering capabilities.

*Based on design by a professional engineer.

KEYSTONE COMPAC UNIT

8" h x 18" w x 12" d
68-74 lbs.

Hewnstone

KEYSTONE PIN

5 1/4" w x 1/2" d

Unit weights and colors vary by manufacturer.
