1. The leveling pad is to be constructed of crushed stone or 2000 psi ± unreinforced concrete.

2. The base foundation is to be approved by the site geotechnical engineer prior to placement of the leveling pad.

- Dimensions & Weight May Vary by Region
- Unreinforced Concrete or Crushed Stone Leveling Pad
- Crushed Rock or Stone
- 4" Perforated PVC Drainage Tile
- Approximate Limits of Excavation

Note:
- When site conditions require, wrap drainage tile in 3/4" aggregate and filter fabric with drainage composite or aggregate back drain system, as directed by geotechnical engineer.

Approximate Limits of Excavation

Note:
- When site conditions require, wrap drainage tile in 3/4" aggregate and filter fabric with drainage composite or aggregate back drain system, as directed by geotechnical engineer.

Retained Soil

Design is for internal stability of the KEYSTONE wall structure only. External stability, including but not limited to foundation and slope stability is the responsibility of the owner. The design is based on the assumption that the materials within the retained mass, methods of construction, and quality of materials conform to KEYSTONE's specification for this project.
